EXECUTIVE PROFILE

Technology and Delivery Leader with 22+ years of experience across global IT services and banking, combining large-scale delivery, technology leadership, client engagement, people leadership and enterprise transformation.

Currently a Vice President at Citigroup, leading technology initiatives across enterprise platforms, data engineering, governance, engineering excellence and strategic stakeholder engagement. Previously progressed to Director – Projects at L&T Infotech, leading multi-team delivery, project governance, client relationships, solution architecture, pre-sales and business development.

Brings a strong combination of business-facing leadership and technical depth across banking technology, enterprise data platforms, cloud modernization and engineering transformation—well suited to leading complex delivery organizations and strategic technology programs.

LEADERSHIP VALUE PROPOSITION

DELIVERY LEADERSHIP
Multi-team delivery, governance, resource management, execution and operational performance.

CLIENT LEADERSHIP
Strategic client engagement, relationship management, pre-sales and business development.

PEOPLE LEADERSHIP
High-performing teams, leadership development, coaching, mentoring and capability building.

TRANSFORMATION
Enterprise data, cloud modernization, platform transformation and engineering modernization.

STRATEGIC EXECUTION
Business priorities translated into technology roadmaps and executable delivery plans.

GOVERNANCE
Delivery, data, security, compliance, vendor management and operational excellence.

CORE COMPETENCIES

Delivery & Business
Technology Delivery | Program Governance | Portfolio Execution | Resource Management | Risk Management

Client & Commercial
Client Engagement | Pre-Sales | Business Development | Account Stewardship | Vendor Management

People Leadership
Organization Building | Leadership Development | Coaching | Talent Development | Performance

Technology
Enterprise Architecture | Data Platforms | Cloud Transformation | Platform Engineering

Engineering
CI/CD | DORA | Quality | Vulnerability Management | AI-Assisted Engineering

Banking
Banking Technology | AML Analytics | Data Governance | Regulatory & Access Governance

PROFESSIONAL EXPERIENCE

CITIGROUP — **Dec 2022 – Present**

Vice President – Technology & Delivery Leadership

Provide technology and delivery leadership across enterprise platforms, data engineering, data governance, platform engineering and engineering excellence within a global banking environment.

Delivery, Stakeholder & Vendor Leadership

- Translate business and product priorities into technology roadmaps, engineering priorities and executable delivery plans.
- Drive cross-functional alignment across engineering, product, governance, business and vendor stakeholders; represent technology in strategic forums.
- Lead Starburst vendor governance, operational reviews, service delivery and contract-compliance discussions.

Engineering & Delivery Governance

- Drive enterprise engineering standards, DORA metrics, CI/CD governance, repository hygiene and pull-request practices.
- Drive vulnerability management using SonarQube and Black Duck and promote AI-assisted code-review practices.
- Support architecture reviews, platform modernization, operational stability and continuous engineering improvement.

Enterprise Platform & Data Leadership

- Lead a PySpark-powered enterprise data-ingestion platform on the strategic Hadoop analytics environment, driving optimization, query performance, data quality and resilience.
- Lead data-fabric governance through Starburst, metadata stewardship, access controls and enterprise data policies; support global users across NAM, EMEA and APAC.
- Collaborate on strategic data-analytics roadmaps and alignment between business objectives, senior-management vision and cloud-adoption priorities.

L&T INFOTECH (LTI) **Jun 2004 – Nov 2022**

Director – Projects | Technology & Delivery Leadership

Progressed through technical, architecture and leadership roles into Director-level responsibility for IT service delivery, project governance, client relationships, solution architecture, pre-sales, business development and people leadership.

Delivery Organization Leadership

- Directed IT service delivery operations with 35+ professionals, including 6–7 direct leads, managing multiple project teams across geographies.
- Led delivery governance, resource planning, project execution and operational performance while maintaining focus on quality, schedule and client commitments.
- Developed team leads through coaching, mentoring and structured leadership development; built high-performing teams focused on continuous improvement.

Client & Account Leadership

- Managed strategic client relationships across marquee banking clients including HSBC and Citizens Bank.
- Contributed to new client acquisition and relationship development; led client discussions around technology solutions, delivery requirements and business priorities.
- Provided technology leadership across solution architecture, pre-sales enablement and business development.
- Selected for the PACE corporate development program focused on strategic client engagement and account stewardship.

People & Capability Development

- Established structured training programs that delivered a 90% increase in effective utilization and upskilling of resources.
- Mentored high-impact teams and strengthened technical and leadership capabilities; recognized for contributions associated with a 50% improvement in team performance.

Recognition: Best Employee of the Year | Multiple Spot Awards | LTI PACE leadership development program

SELECTED TRANSFORMATION PROGRAMS

Citi Voyager – Enterprise Data Fabric / AML Analytics | Team 8 (Ctigroup)

Engineering Manager / Principal Engineer – Citi

- Self-Service Workspace Provisioning: Lead the engineering and delivery of a self-service workspace provisioning capability that automates infrastructure setup, accelerates project onboarding, and reduces dependency on central IT teams.
- Federated Data Analytics: Architect and oversee the implementation of Starburst-based federated data analytics, enabling high-performance cross-platform data access while ensuring enterprise-grade data governance, security, and access controls.
- Integrated Entitlement Management: Drive integration with Citi's enterprise-wide Entitlement Management System (EEMS) to establish secure, centralized, and auditable access management across the platform.
- Self-Service Data & Platform Marketplace: Lead the engineering of a global self-service marketplace with maker-checker workflows, enabling users to request and obtain access to data sources and platform capabilities in a controlled and governed manner.
- Cloud Analytics Gateway: Own the technical direction of the cloud analytics gateway, leveraging Starburst to provide governed access to data across AWS and IBM S3, supporting Citi's broader cloud adoption and migration strategy.
- Technical Leadership & Architecture: Provide technical leadership and architectural direction across the application, driving engineering standards, platform scalability, reliability, security, and integration with enterprise services.
- Performance & Stability Engineering: Resolved complex Starburst performance and stability issues by analyzing query execution plans, optimizing small-file patterns, addressing stale table statistics, and tuning Starburst configurations in partnership with Starburst engineering.
- Query Optimization & GenAI: Lead advanced query optimization and performance engineering while driving a GenAI Query Assistant solution to intelligently identify query issues and recommend performance improvements.
- Stakeholder & Delivery Leadership: Partner with product, architecture, governance, security, infrastructure, and data teams to define the technology roadmap, prioritize engineering initiatives, and deliver capabilities aligned with Citi's enterprise data strategy.

Data Lake Modernization – Citizens Bank | Team 50+

- Contributed to enterprise-scale migration from a legacy Hadoop-based on-premises data lake to an AWS-native data lake.
- Supported ingestion across 135+ sources and 3,100+ daily feeds, processing approximately 1.5 TB of data per day.
- Enhanced Source → Raw → Curated → Aggregated architecture with data quality, audit, compliance, governance, lineage and BI enablement.

MessageWay Decommission & Real-Time File Delivery | Team 10

- Led modernization and decommissioning of a legacy file-delivery platform; delivered a highly available event-driven transformation capability.
- Conducted technical roadshows and proof-of-concept demonstrations to secure stakeholder buy-in; improved operational resilience and reduced third-party middleware dependency.

ETL Center of Excellence | Team 20

- Managed the ETL CoE as Program Manager and Lead Architect; defined enterprise standards for ETL development, deployment and governance.
- Led legacy ETL migration and standardization and established cross-training/internal certification programs.

TECHNOLOGY DOMAIN

DOMAIN	EXPERTISE

Data & Analytics	PySpark | Python | SQL | ETL | Hadoop | Hive | Big Data | Starburst | Trino
Cloud	AWS | S3 | Glue | EMR | Redshift | QuickSight | AWS Data Lake
Architecture	Enterprise Data Architecture | Data Fabric | Microservices | REST APIs | Data Integration
Engineering	CI/CD | Jenkins | Git | DORA Metrics | SonarQube | Black Duck | AI-Assisted Code Review
Governance & Security	Data Governance | Metadata | Data Quality | Access Controls | Entitlements | AD | FIDs | CyberArk | Vault
AI & Productivity	GitHub Copilot | Devin AI | Prompt Engineering | AI-Assisted Engineering | Agentic AI Concepts
